

# THE CORNER FRIDGE INTEGRATED COLD ROOMS FREESTANDING COLD ROOMS WALK-IN COLD ROOMS

Just one square metre of floor space, allows the Corner Fridge to provide 1,300 litres of storage!

## Corner Fridge

The legendary Corner Fridge makes full use of a kitchen corner; something that kitchen cabinetry alone struggles to do. In the process, the Corner Fridge creates 1,300 litres of capacity. To put this into context, that's 5 x times the capacity of a conventional refrigerator!

Just imagine the convenience of one central store for all your fresh food and drink requirements and just imagine the ability to see all your provisions, to include large items such as multi-packs, and sacks of potatoes at a glance.

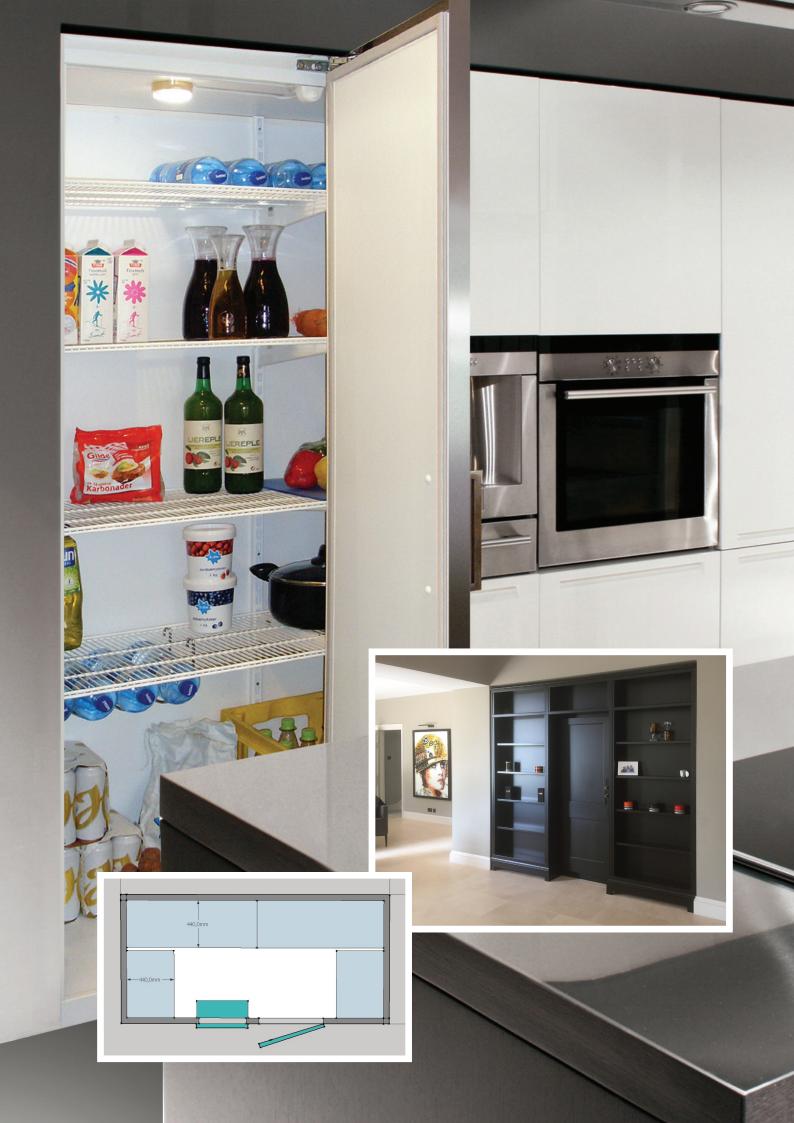

The beauty of a Corner Fridge extends to the impact it has on ones pocket. Its 'A' rated, energy efficient status means that it won't cost a fortune to run and due to its capacious Interior, produce doesn't have to be tightly packed allowing for far better air circulation than that of a tightly pocked 'ordinary' refrigerator. This allows food to stay fresher for longer• greatly reducing food wastage. Furthermore, the ability to do one large shop, rather than several shops throughout a busy week, will save you both time and money.

#### The Corner Fridge at a glance:

- Can be designed into kitchens of all sizes
- Can be free standing or integrated into most types of kitchen cabinetry
- The ability to see all your provisions, at a glance, in one convenient location
- Has the capacity to hold up to 5 x that of a conventional refrigerator reducing the need to shop so often
- Food stays fresher for longer due to more space and improved air circulation
- The capacity to store ready made items such as platters and cakes
- The ability to store large items such as multipacks, boxes and sacks of vegetables
- Anti bacterial· easy to clean wall, floor and ceiling surfaces
- 'A' rated, energy efficiency

#### Cold Rooms

# Haven't got a suitable corner? A free standing or integrated Cold Room is the ideal solution

If you don't have a corner within your kitchen space that you can utilise then one of our Cold Rooms could be the perfect solution.

Our Cold Rooms are perfect for flat wall applications and can be free standing or easily integrated into most types of kitchen cabinetry.

The same legendary build quality along with many of the Corner Fridge's features and benefits are shared. For example the same highly Insulated - easy to clean - 'food safe' floor, wall and ceiling materials are used, as are the adjustable shelves and efficient lighting.

However, besides its energy efficient performance and build quality, the real beauty of our Cold Rooms is that they can be custom designed to suit your individual needs and available space. Even custom - 'walk in ' - Cold Room solutions are possible!

Free standing units in 4 x 'off the shelf' sizes are also available.

There are 4 x free standing sizes available

Accessories to help tailor your Corner Fridge or Cold Room to your individual requirements include bottle holders, additional shelving and shelf sheets - to contain small food Items.

### **Specifications & Important Information**

Technical Specification and Important Information common to both The Corner Fridge and Cold Rooms

Noise Level: 36dB / 28dB
Insultation: 54mm of foam
Power consumption: 160 W

Cooling Capacity 390 W / Coolant: R 600 a (106g)

• Temperature Range: 3°C - 20°C

- Automatic defrosting with electronic thermostat
- Comes with three metre flex with plug for 13 amp socket - (plug also supplied)
- Comes with adjustable legs:
   legs have 148 to 178mm of adjustment
- Door that can be hinged left or right
- Comes with white 'Food Safe' scratch resistant interior (ceiling floor/ walls) and adjustable shelves
- \* For bespoke Walk-in Cold Rooms floors might not be possible dependant on size.

**Noise:** Noise level is approximately 36dB at one metre from the door - when the compressor is running. In 'stand-by' mode, the noise level is 28dB.

**Ventilation:** Minimum acceptable ventilation distance from the floor is 100 mm (supplied adjustable legs offer 148 to 178 mm). Minimum ceiling height required is 2000 mm to allow 50 mm top and 100 mm bottom for ventilation.

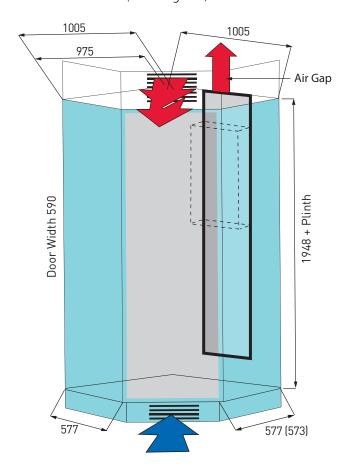

Units give off heat which must be vented, via the upper comportment, so as not to overwork the compressor. If you integrate to the ceiling extra ventilation grills must be fitted above the Corner Fridge or Cold Room.

**Power Supply:** A 13 amp, earthed socket is required on the right hand wall and should be positioned 800 mm from the corner and 2200 mm from the floor.

Maintaining: The filter on the front panel must be vacuum cleaned every 3 x months to avoid over heating. All shelves should be washed in warm soapy water once a month and dried thoroughly before replacing. Similarly - floors, walls and ceilings should be wiped clean with warm soapy water and any food or drink spillages immediately wiped clean.

# Technical Specification - Unique to The Corner Fridge

- 1,300 litres of internal capacity
